About Emerald Health Pharmaceuticals Inc.

Emerald Health Pharmaceuticals is developing product candidates derived from cannabinoids for the treatment of inflammatory, autoimmune, metabolic, neurodegenerative, and fibrotic diseases. The company has two families of new chemical entities, based on cannabidiol, CBD, and cannabigerol, CBG, that it has modified through rational drug design to affect validated receptors pertinent to targeted diseases. Its first drug candidate, EHP-101, is focused on treating multiple sclerosis and scleroderma. Its second, EHP-102, is focused on treating Huntington's disease and Parkinson's disease. The company is advancing preclinical development with the intent to launch a Phase 1 clinical study in 2018.
